

Optical Outsourcing Headaches?

Qioptiq Imaging Solutions offers a full spectrum of optical outsourcing services to provide our customers with open access to cost-effective imaging solutions and immediate project relief.

Accessible

When you're up against a critical optical challenge, you want to know that you are in contact with the people best suited to meet your needs. As a relatively small optical solutions provider, we believe a direct customer service approach is most effective. From initial contact through final production, our engineers and technicians will be firmly embedded in your process.

Flexible

Design and development... engineering to prototyping... one-offs or mid-thousand runs, we can engage your optical product development process at virtually any stage. The earlier you engage Qioptiq Imaging Solutions, the more optimized and cost-effective the end result will be. Located in the North American epicenter for optics, our state-of-the-art 41,000 sq.ft. facility features a fully equipped machine shop, Class 10,000 clean capabilities, and ample room for seamless ramp-up to dedicated lines for your optical components, sub-assemblies or systems.

Knowledgeable

Our development team possesses an abundance of optical experience and knowledge. Under a systems engineering approach, we maintain extensive optical, mechanical, electrical, control and manufacturing engineering capacities to ensure we are continuously pushing the envelope of optical and imaging innovation.

Effective

We realize that cost-effectiveness is always a critical factor in obtaining a custom solution. We strive to provide solutions within your budget parameters and on schedule... and we check and balance your project repeatedly through the process to arrive at your desired goals.

**Take Two...
and Feel Our
Responsive Service Go
to Work on Your Worst
Optical Outsourcing
Symptoms.**

Innovative

Qioptiq Imaging Solutions possesses strong core competencies in zoom optics, telecentricity, structured-illumination, optical algorithms, stereoscopies, image enhancement, and ultra-precise opto-mechanics. We will bring a vast optical resource to bare on your optical component, sub-assembly or imaging system challenge.

Thorough

Our project process mandates periodic validation and verification stages to correctly define your parameters and ensure that we stay within performance specifications and adhere to budgets. What's more, we maintain fully equipped imaging and optics labs to ensure your products perform to spec... And we don't stop there, engineering for optimal production and performing continuous process analysis to identify further yield and cost improvements.

Experienced

Qioptiq Imaging Solutions enjoys a 25-year reputation for excellence in development and manufacturing of a wide variety of popular brand optical products for an ever-growing array of markets and applications. This rich foundation in optical manufacturing combined with our ISO 9000:2001 certification assures you of the most rigorous quality control and operational standards.

House calls

Whether you require rapid-prototyping, manufacturing and assembly, or grass roots development, Qioptiq Imaging Solutions has your outsourcing remedy. We will gladly assemble the appropriate exploratory team to meet with you, define your parameters, identify possible approaches, and discuss options. **Rush effective relief of your worst optical outsourcing symptoms...
